Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/563,558

Applicant(s)

BEHAR ET AL.

Examiner

J. Casimer Jacyna

Art Unit

3754

Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 05 October 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-14 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-10 and 12-14 is/are rejected.
- 7) ☒ Claim(s) 11 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☒ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO-1448 or PTO-889)
- 4) ☐ Interview Summary (PTO-413)
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____
- Paper No(s)/Mail Date 01/05/06

Art Unit: 3754

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

2. The abstract of the disclosure is objected to because of the use of legal phraseology as noted above. Correction is required. See MPEP § 608.01(b).
3. The disclosure is objected to because of the following informalities: The specification lacks the headings noted in MPEP 608.01(a).

Appropriate correction is required.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1, 3-10 and 12-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Sanchez 2003/0168476. Sanchez discloses a fluid dispenser head 1 that

cooperates with a dispenser member 31 on a fluid reservoir 21 including a fluid duct with an inlet 118b and an outlet dispensing orifice 122, a closure means that includes a closure member 123 that rotates to an open position at 124, a non-rotary portion 11, a rotary portion 12, displacement means 120 that can be grasped by a user to rotate 12 and 123 with respect to 11 as claimed. In regard to claim 9, the distal area of 123 adjacent 124 constitutes the closure member because it performs the valve function of either sealing or opening outlet 118a as shown in figures 3A and 3B, the other end of 123 adjacent 123a constitutes a connection element as claimed because it connects the valve portion adjacent 124 to 116 wherein 116 is an anchor element as claimed because it is the base of the rotary section 12 that supports and secures 12 for rotation of 11. In regard to claim 13, figure 3A is a locked position as claimed which prevents the dome of 125 from being pushed wherein the dome of 125 is a pushbutton that actuates 31.

6. Claims 1-10 and 12-14 are rejected under 35 U.S.C. 102(b) as being anticipated by McKinney 4,257,561. McKinney discloses a fluid dispenser head 10 that cooperates with a dispenser member 34 on a fluid reservoir 26 including a fluid duct with an inlet adjacent 28 and an outlet dispensing orifice 36, a closure means that includes a closure member 30 that is closed and opened by screwing and unscrewing rotary member 10 with the upper wall of 10 alternately applying pressure on 30 to close 30 as shown in figure 2 or being spaced from 30 to allow 30 to open and to allow fluid to be dispensed as shown in figure 3, a non-rotary portion 22, displacement means as are threads 24 because they cause the axial motion of rotary portion 10 with a portion of threads 24

Art Unit: 3754

located on the non-rotary portion 22 as called for in claim 2. In regard to claim 9, the upper surface wall of 10 surrounding 36 is an anchor element as claimed because it holds or anchors the closure member 30 in place with the sidewall of 10 extending from the top of 10 to the threads 24 being a connection element as claimed. In regard to claim 13, 18 is a pushbutton that is alternately locked and unlocked with 14 depending on the position of 10 as claimed.

7. Claim 11 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to J. Casimer Jacyna whose telephone number is 571-272-4889. The examiner can normally be reached on Mon. thru Fri. 9AM-5PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kevin Shaver can be reached on 571-272-4720. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
